

Setup custom scenes

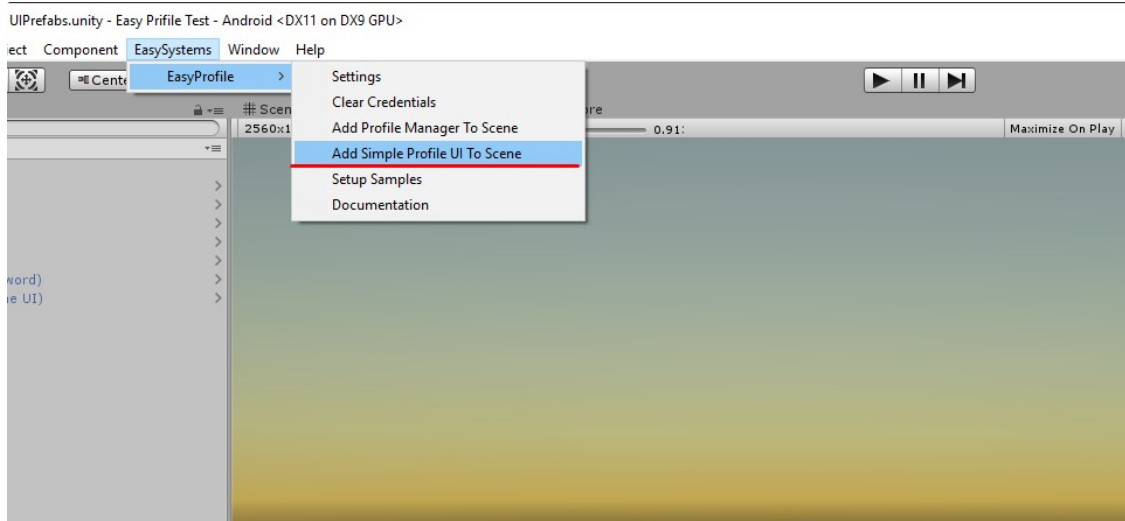

1. To setup your custom scenes - create two scenes, one for login, second for profile

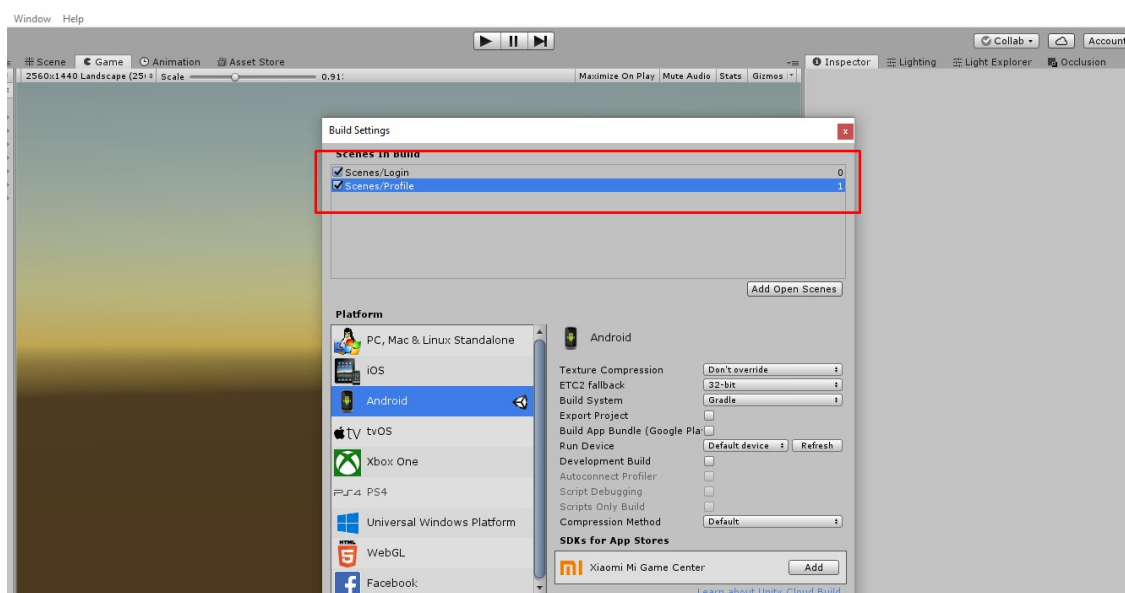

2. Open "Login" scene and run command **EasySystems/EasyProfile/Add Profile Manager To Scene**

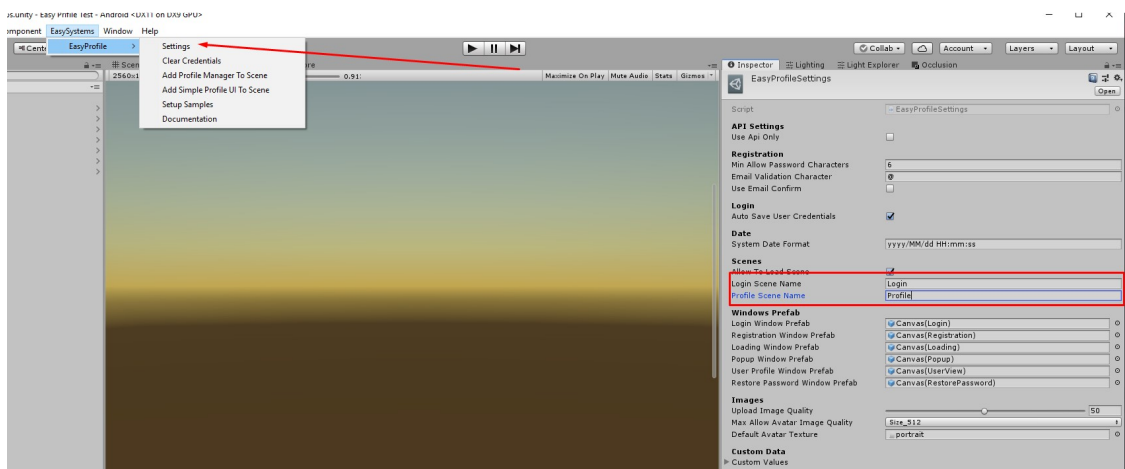

3. Open "Profile" scene and run command **EasySystems/EasyProfile/Add Simple UI To Scene**

4. Add two scenes to Build Settings

5. navigate to EasySystems/EasyProfile/Setting and set LoginSceneName and ProfileSceneName of your scenes

6. Open and run your "Login" scene

7. Check video tutorial

8. if you have any questions, please contact us assets@uni-bit.com
